

B&J BISCUIT SALES DASHBOARD

Presented By

T.Gowri

1. PROJECT OVERVIEW

THIS PROJECT IS AN INTERACTIVE EXCEL SALES DASHBOARD CREATED FOR B&J BISCUIT. IT HELPS ANALYZE SALES, REVENUE, PROFIT, CUSTOMERS, LOCATIONS, BRANDS, AND PAYMENT METHODS. THE DASHBOARD PROVIDES BUSINESS INSIGHTS USING CHARTS, KPIS, AND SLICERS FOR BETTER DECISION-MAKING.

2. Problem Statement

The company has sales data, but it is difficult to understand business performance from raw data. Management needs a dashboard to monitor sales, identify profitable areas, analyze customers, and make faster business decisions.

3. Dataset Overview

Order Date
Customer Name
Product Brand
Product Category
Quantity Sold
Revenue
Cost (COGS)
Profit
Payment Method
Customer Age
Gender
Salesperson
City/Location

The dataset is used to calculate sales performance and profitability.

4. Data Cleaning

Removed duplicate records.
Corrected missing values.
Standardized date format.
Fixed incorrect data types.
Created Age Groups.
Created Price Categories.
Added calculated columns for
Revenue, Profit, and Profit Margin.
Loaded cleaned data into Power Pivot.
